MHL™ connectivity

This projector supports MHL™ connectivity (via an MHL™/HDMI® port), which means it can display uncompressed HDMI® audio/video from any smartphone or mobile device that supports MHL™. This projector will also charge the battery of the connected mobile device. The user can also wirelessly connect this projector to such a mobile device by inserting Acer's unique MHL™ wireless adapter into the projector's MHL™/HDMI® port. In this way, this projector can wirelessly display the audio/video content of any device that supports Miracast™ Wi-Fi Display, WiDi Wireless Display or DLNA.

Acer ColorSafe II

Acer projectors that feature ColorSafe II are virtually immune to color decay — the yellow or green tint of images displayed by some projectors that have been used for extended periods of time. Acer projectors with ColorSafe II take advantage of DLP® technology and Acer's unique optics-based color-compensation technology to guarantee picture integrity even after prolonged use. The resulting extended lifespan and consistent image quality lower the total cost of ownership.

Presentation to Go

The K135 offers 2 GB of internal memory, a micro SD card reader and USB multimedia readers that enable the Presentation To Go function: Full access to photos, videos, music and Office documents (PowerPoint, Excel, Word and PDF), directly from the projector — no need for a laptop PC or video player!

Acer EcoProjection

Acer EcoProjection with ExtremeEco is a complete environment-friendly power management solution that reduces standby power consumption by up to 70%. Also featured in the Acer EcoProjection suite is Acer ePower Management for customized power-saving configurations.
