Functions
1) To use the laser pointer on, press and hold the 'laser pointer' button.
2) Press the 'page up' button for 2 seconds to view the current slide. If the button is held for another 2 seconds, the slide will appear in full screen mode.
3) Press the 'page down' button to move to the next slide during the presentation. The 'page up' takes you back to the previous slide.
4) To pause the presentation with a black screen, hold the 'page down' button for 2 seconds. If held for another 2 seconds, the presentation will continue with the following slide.
5) To move the cursor on the screen, press the 'mouse' button.
6) Press and hold the 'print' button: to record comments during the presentation.
7) To remove the comments, press the 'erase' button.
8) To increase the volume, press the 'volume' button and move the pointer upwards. To lower the volume, move the pointer downwards.
9) The LP250 supports PowerPoint, Keynote and Prezi. The presentation mode can be changed by simultaneously pressing the 'page up / page down' buttons. By default, the up and down buttons on the LP250 have the same function as the up and down arrows on your keyboard (PowerPoint / Keynote). If you press
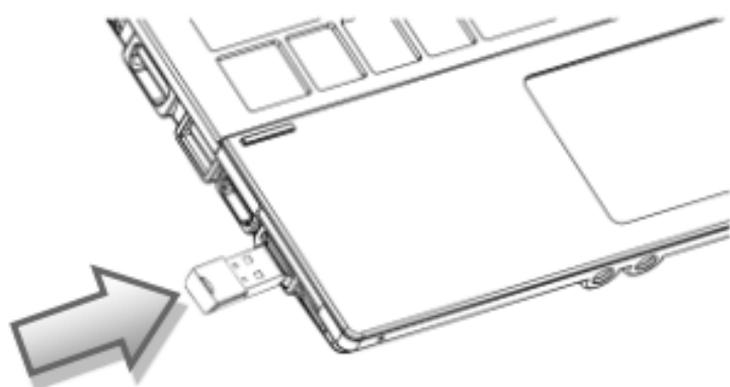

the up and down buttons simultaneously, they function as left and right arrows when using Prezi. When pressed 3 times, the LP250 goes back to its default settings.

Installation
1) Take out the mini USB receiver from the wireless presenter

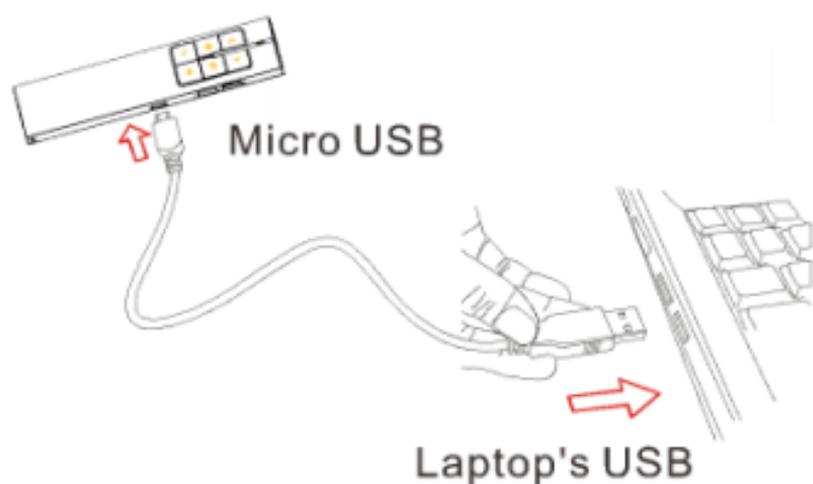

2) Insert the USB receiver into a USB port

Operating systems such as Windows, Android and Linux automatically install the driver for the USB receiver.

3) After the automatic installation, the presenter can be used. The blue LED will flash with each press of a button.

4) To switch the presenter off, use the switch on the side.

5) If the LED flashes slowly, the battery is low and needs to be charged.

6) To recharge the battery, connect the LP250 with the USB cable provided to your computer. The red LED indicates that it is charging. Once the battery is fully charged, the LED light goes out (about 2 hours).

Micro USB

Laptop's USB

Recharging the wireless presenter via USB cable

FAQ

1.   Why does the laser pointer not work?

Check whether Presenter is switched on. If the LED flashes slowly, it means that the battery is low and needs recharging.
