3) User guide

**Technical specs**

<u>Transmitter</u>
| | |
|---|---|
| Technology: | Radio frequency |
| Frequency: | 2.4GHz |
| Range control: | up to 100m |
| Laser: | Class 2M |
| Laser power: | <1mW |
| Laser distance: | >200m |
| Wavelength: | 650nm |
| Battery: | 1 x AAA |
| Operating Voltage: | 1.5V |
| Weight: | 21.7g |
| Dimensions: | 139.2 x 18.2 x 19.7mm |

<u>USB receiver</u>

| | |
|---|---|
| USB Version: | USB 2.0 |
| Betriebsspannung: | 5V DC |
| Abmessungen: | 26.5*12.7*5.5 mm |
| Gewicht: | 1.9g |

## II.      Functions - overview

- LED
- Multifunctional button
- Page up — Hold to start PPT
- Page down — Hold for black screen
- Laser pointer

- Volume +
- Volume -
- On/off switch
- Battery compartment
- USB receiver

**Functions**
1) To use the laser pointer on, press and hold the 'laser pointer' button.
2) Press the 'page up' button for 2 seconds to view the current slide. If the button is held for another 2 seconds, the slide will appear in full screen mode.
3) Press the 'page down' button to move to the next slide during the presentation. The 'page up' takes you back to the previous slide.
4) To pause the presentation with a black screen, hold the 'page up' button for 2 seconds. If held for another 2 seconds, the presentation will continue with the following slide.
5) The LP150 supports PowerPoint, Keynote and Prezi. The presentation mode can be changed by simultaneously pressing the 'page up / page down' buttons. By default, the up and down buttons on the LP150 have the same function as the up and down arrows on your keyboard (PowerPoint / Keynote). If you press the up and down buttons simultaneously, they function as left and right arrows when using Prezi. When pressed 3 times, the LP150 goes back to its default settings.
6) If your presentation contains hyperlinks, you can navigate the links with the multifunction button. A double click opens the link. (WPS does not support this function). Hold the multifunction button to switch between programs. To open a program, release the button.
7) The volume can be controlled with the volume + and volume – buttons.

**Installation**

1) Insert the battery

2) Take out the mini USB receiver
3) Insert the USB receiver into a USB port

Operating systems such as Windows, Android and Linux automatically install the driver for the USB receiver.

4) After the automatic installation, the presenter can be used. The blue LED will flash with each press of a button

5) To switch the presenter off, use the switch on the side

6) If the LED flashes slowly, the battery is empty and needs to be replaced

Turn off presenter

**FAQ**

**1. How do I know that the battery is low?**

Turn on the presenter. When the LED flashes slowly, the battery is empty and needs to be replaced. Alternatively press the laser button to determine if the laser can be turned on. If it cannot be switched on, the battery needs to be replaced.

**2. Why does the laser pointer not work?**

Check whether the Presenter is switched on. If the LED flashes slowly, it means that the power is low and the battery needs to be replaced.
