Dual case design for wall or ceiling installation
USER'S GUIDE
Ver. 1.2

Pre-installation

1. Carefully unpack the screen.
2. Always handle the screen in a leveled position on a clean surface.
3. In order to protect the screen from exposure to stains, keep the screen out of contact with foreign objects such as dust, saw dust, and/or liquids.

Note: Regardless of the mounting method, the screen should be securely supported so that when retracted, deployed, or even abusive pulling on the screen, the case will not become loose or fall. The installer must insure that the fasteners used are of adequate strength and suitable for the installation location. If line drawing/dimensions are needed, please visit www.elitescreens.com/dimensions.

INSTALLATION

A. Flush Wall Mounting (Hardware not included)

1. Mark the location of where the screen is to be installed and drill your holes.
2. Insert the proper screw and leave about 1/8" of an inch from the wall to mount the screen.
3. Mount your screen from the keyhole located on back of the screen's left and right end cap.

Note: Do not remove the end caps to mount the screen to the wall. Removing the end caps will release the tension of the internal spring mechanism

B. Ceiling Installation (Hardware not included)

1. Only screens with flanges (models: 128" – 170") can be flush mounted to the ceiling by drilling screws directly through the screw holes and in to the ceiling's fixture. For D-ring installation to the ceiling, please refer to option 2.

Optional installation method using chains to hang the screen from the ceiling:

2. You can hang the screen from the ceiling by using chains (not included) and hooking them to the D-ring loops on models 71"-120" and 136S, which are located on each end of the housing. For models 128"-170", U-bolts are required to create loops for hanging the screen with chains from the end caps' flanges.

Note: Please consult with a hardware store professional for proper screws for your specific wall or ceiling installation. **Hardware and U-bolts are not included with the manual screen.**

SCREEN OPERATION

*Note: **Always** pull the screen down or let it up in a 90-degree vertical angle. Do not allow the screen to touch the screen case when the screen goes up or comes down to avoid damaging the screen material.*

1. Pull the screen down from the lanyard or from the handle only in a 90-degree angle. Do not attempt to pull the screen down by the surface or touch the screen, as it will damage the screen and void the warranty.

Note: An internal auto-lock mechanism system will cause the screen to stop and lock on the position at intervals.

2. If you want the screen to retract back, simply pull the screen down more than 2 inches and retract the screen back by quickly and smoothly releasing it up gently.

Note: Always release at a 90-degree angle and do not let go until the screen is entirely inside the case. If ever the screen feels stuck, keep in mind that the screen's mechanism is new and needs to be run up/down a few times to loosen up. If this happens, carefully with a little force yank the screen straight down to unlock the screen.

Note: Improperly bringing the screen up/down will damage the screen material or rolling system.

MAINTENANCE

Clean matte white screen material with a soft cloth and mild soap with water.

When not in use, retract screen in its housing to keep the screen material surface clean.

NOTE: Regardless of mounting method, the screen should be securely supported so that vibration or even abusive pulling on the viewing surface will not cause the case to work loose or fall. The installer must insure that the fasteners used are of adequate strength and suitable for the mounting surface chosen.
