

Home entertainment projectors

Get closer
to the action

EPSON[®]
EXCEED YOUR VISION

Truly advanced, genuinely innovative products

Our projectors use many of the world's most advanced techniques and technologies to ensure the products deliver a truly immersive and satisfying home cinema experience.

Screen size matters

Set the scene

Make your home centre stage for all the action with Epson's home projectors. Transform the everyday, whether you're catching your favourite sports, watching a classic movie, streaming a breaking box set, or playing the latest game; make it a truly unforgettable experience with a larger-than-life projected image. You can capture everyone's attention and bring family and friends together to experience those memorable moments.

Flexible installation

Perfect images every time

We think that setting up a projector should be simple. As such, our projectors are easy to place just about anywhere. Have a perfectly adjusted image in seconds; with our optical zoom, vertical and horizontal lens shift¹ and keystone corrections, you're sure to find our projectors are quick and easy to set up. You can experience a 100 inch (254cm) widescreen display from just three meters away with any blank wall or screen.

Ultra Bright 3D colours

A better, brighter 3D viewing experience

Luminance enhancement technology means 3D content is much brighter than with many Full HD 3D home cinema projectors. That's because all active-shutter 3D glasses tend to reduce brightness, as they 'switch' from one eye to the other. But, by doubling the speed of this switchover, we've significantly reduced the loss of brightness, giving a better, brighter, more satisfying 3D viewing experience.

Super-Resolution and detail enhancement

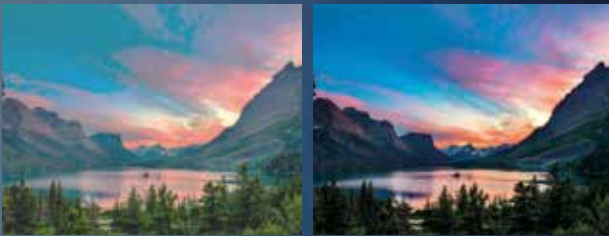

Without Super-Resolution

With Super-Resolution

Sharp, clear images every time

With Epson's Super-Resolution technology you'll experience crisp, clear images, no matter what you're watching. Designed to reduce the blurriness caused by zooming and enlarging, it uses sophisticated techniques to sharpen every frame in the film, bringing DVDs and standard definition content alive.

Superb dynamic contrast

Lower contrast ratio projector

EH-TW6700 Series

Total clarity in all lighting conditions

Lighting conditions can often change during a film, so it's essential for your projector to keep up with the varying contrast levels, to continually deliver the best image. Our home entertainment projectors offer high levels of dynamic contrast - a ratio of up to 70,000:1. Paired with C2fine panels, our highly effective auto-iris feature ensures optimum contrast and brightness in every scene, whether light or dark, bringing out the true brilliance of Full HD images.

Frame Interpolation (2D/3D)

Smoother fast-moving action in bright and vivid Full HD

Providing more fluid action images and reducing motion blur in fast moving scenes, frame interpolation technology inserts new frames between the original ones. As a result, blurring is suppressed and moving images look much smoother and sharper.

MHL™ Connectivity²

Make smartphone and tablet content larger than life

Supersize content on your smartphone or tablet with the MHL (Mobile High-Definition Link) connection. Plug in to easily project and enjoy video, pictures and games from any MHL compatible smart device. Plus, you can also charge your devices at the same time. Conveniently, the projector's remote can filter which content is received from compatible devices, so you can stay in control at all times.

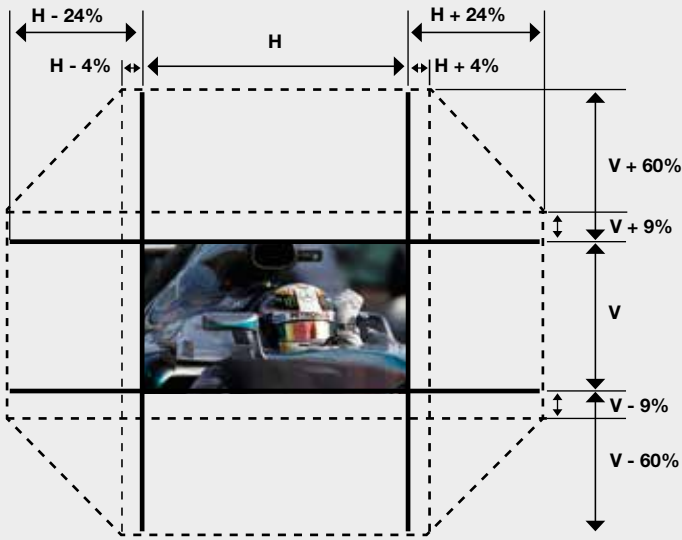

The big home screen experience

So whether you're a film lover, a games enthusiast or a sports fan, you'll love our latest range of Home Cinema high definition projectors. By using advanced technologies, our projectors make films brighter and more alive, video games faster and smoother and sports more compelling and involving. Offering many advanced features, there's a product to suit every need.

EH-TW6700/EH-TW6700W

- Full HD 1080p 2D and 3D technology
- Colour Light Output of 3,000 lumens for bright picture
- 70,000:1 contrast ratio for deep blacks
- WirelessHD³ connection offers Full HD 3D cinematic viewing without cables (EH-TW6700W only)
- Enhanced Super Resolution in 2D and 3D mode
- Extended vertical and horizontal lens shift
- 5 colour modes in 2D and two in 3D
- Watch a movie with the big screen experience every day for the next 7 years thanks to a long lamp life⁵

Full HD 3D home cinema experience

Make the most of your favourite 2D and 3D content and enjoy smart features usually found on more expensive models with these great value projectors. Delivering a superb 1080p, Full HD picture, the EH-TW6700/EH-TW6700W has a high contrast ratio for deep blacks and enhanced Super Resolution in both 2D and 3D modes. Setting up in any room is easy thanks to the wide lens shift, optical zoom and two HDMI connections.

Brighter, vivid projection

White brightness alone cannot bring the true colours you see everyday to life. That's why the 3LCD technology found in Epson's projectors delivers an equally high white and Colour Light Output (CLO).

While other manufacturers believe they can improve image quality by just increasing the brightness of their projectors' white light output, Epson ensures that its projectors combine brightness and True Colour to create vibrant and realistic images. Why settle for a dull, washed out and lifeless screen? Experience vivid and lifelike images with Epson's projectors that offer a colour brightness that matches the white light brightness.

TRUE COLOURS

High quality home cinema made affordable

Ideal for film enthusiasts, gamers and sports fans who want to watch Full HD content on the big screen in the comfort of their own home. Boasting features usually found in top-of-the-range models, this product offers high-definition 2D and 3D viewing that's easy to set up and use.

EH-TW5350

Full HD 1080p 2D and 3D technology
Colour Light Output of 2,200 lumens for bright picture
35,000:1 contrast ratio for deep blacks
Horizontal & vertical keystone correction for easy set up (+/-30°)
Clearer, smoother, fast moving action and enhanced details with frame interpolation and image enhancement
Miracast⁴ connectivity for smartphone and tablet content
Watch a movie with the big screen experience every day for the next 11 years thanks to a long lamp life⁵

EH-TW5300/EH-TW5210

Full HD 1080p 2D and 3D technology
Colour Light Output of 2,200 lumens for bright picture
35,000:1 / 30,000:1 contrast ratio for deep blacks
Horizontal & vertical keystone correction for easy set up (+/-30°)
Clearer, smoother, fast moving action and enhanced details with frame interpolation and image enhancement
Large screen size – up to 300 inches
Watch a movie with the big screen experience every day for the next 11 years thanks to a long lamp life⁵

Enhance your work / life balance

EB-U04

Enjoy up to 15 years
of entertainment⁵

With up to 10,000 hours lifetime on the lamps, you could watch a movie every day for the next 15 years without having to replace them. With Epson reliability, you don't have to worry about missing a minute of your favourite film or programme.

Key features

Watch your content in Full HD, Bright, vivid images even in a light environment

Colour Light Output of 3,000 lumens for bright picture

Enjoy clearly defined shadow detail and deep blacks with a 15,000:1 contrast ratio

Flexible positioning with automatic vertical and manual horizontal keystone correction

Easily connect your Wi-Fi enabled devices with optional wireless connectivity⁶

Connect dual digital devices such as your Blu-Ray player and games console and switch content quickly or show both in split screen

Bright, vivid images

These 3LCD projectors have a range of features to make the most out of your home and small business projection. This includes an equally high White and Colour Light Output of 3,000 lumens and colours that are three times brighter⁷ than standard 1-chip DLP projectors.

EB-S04

- SVGA (800x600)
- Colour Light Output of 3,000 lumens
- 1.35x digital zoom
- Automatic vertical keystone correction
- Eco tab setting and auto lamp dimming function
- Wireless compatible⁶
- 1W integrated speaker
- 10,000 hours lamp life in eco mode

EB-W04

- WXGA (1280x800)
- Colour Light Output of 3,000 lumens
- 1.2x optical zoom
- Automatic vertical keystone correction
- Eco tab setting and auto lamp dimming function
- Wireless compatible⁶
- 1W integrated speaker
- 10,000 hours lamp life in eco mode

“**Watching an average 1 hour 45 minute movie everyday means the ability to enjoy your favourite films for the next 15 years thanks to a long lamp life⁵**”

Three times brighter

These 3LCD projectors offer home and small office users colours that are three times brighter⁷ than 1-chip DLP projectors using an equally high White and Colour Light Output of up to 3,200 lumens. This means you get bright, sharp, clear images without having to sit in a dark room.

EB-S31

SVGA (800x600)
