# CONVENTION PROJECTION SCREENS

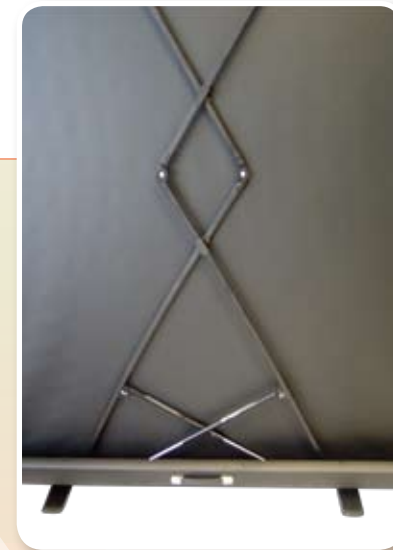

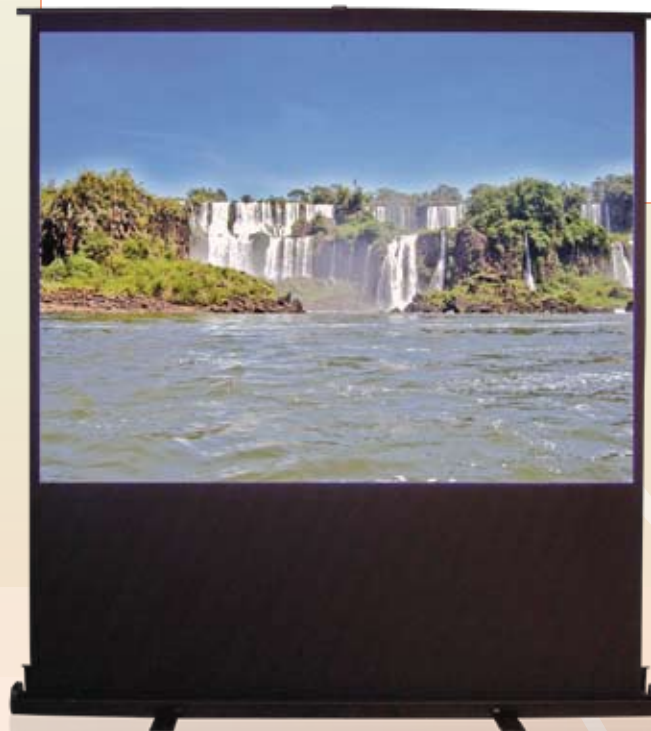

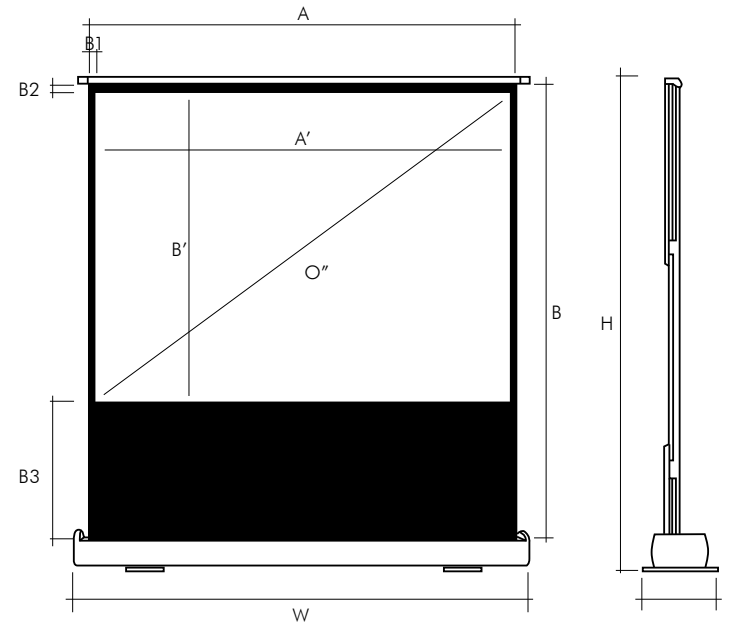

with pantograph type opening system

PROJECTION

CONVENTION screen differs from his brother "Mobile Convention" for the presence of two stabilizing feet replacing the transport wheels. This product represents the ideal solution for users that need a wide projection surface, but are limited in space and installation. The black aluminium case ensures the dust-free storage, while the pantograph-type system allows adjusting the distance of the projections surface from the ground.

## Technical features

- **Screens** made of MATT WHITE fabric (see technical data sheet at pages 1-2-3)
- **4 cm perimetrical black borders**; with a larger one beneath the projection surface, to allow the adjustment of the projection surface distance from the ground.
- **Pantograph opening and support system** which allows, in just one move, to get the screen ready to work; wind-up and spring return system; quiet and reliable.
- **Sturdy, ultra-light aluminium case** Epoxy powder coated, black colour, pleasant and elegant design, suitable for transportation, perfectly foldable
- **One handle** in sturdy ABS with steel core, enable easy handling and transport of the screen.
- **Two feet** folding, retractable and stabilizers are placed below the case and ensure to the screen, once open, the correct stability

Close up of the pantograph opening system and retractable, stabilizing feet
